

A ROYAL FLUSH

Your Winning Hand for Pre-Cleaning Protocol CE Education Program

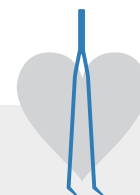

Call, raise, or fold: a quick self-analysis of your current pre-cleaning practices will help you determine how to best play your current hand. Pure Processing has developed a complete educational session on the evaluation and implementation of stronger pre-cleaning practices for lumened instruments, how to evaluate the cards you've been dealt, and how to trade for a stronger hand. Follow along with the steps below to participate in the full educational program and earn CE credits.

STEP 1

Go to www.pure-processing.com/flushing-information/ and take our brief informational survey to access the full length session video, the Departmental Analysis Hand-Out, and a copy of our PowerPoint presentation.

STEP 2

Watch the full video session to answer the following educational objectives:

1. Learn how to identify quality pre-cleaning practices
2. Understand the most common methods for pre-cleaning, and how they're different
3. Learn the questions to ask so you can analyze your current procedures and make action plans in decontamination

STEP 3

Take a tour of your sterile processing department, and follow along with the **Department Analysis Hand-out** as part of the educational package, to specifically identify areas for improving your decontamination procedures.

STEP 4

Submit an email to our Education Desk at mpietura@pure-processing.com to receive certificates of completion to submit for CE credits.
