

PureStation™ Sink Insert

The PureStation™ Sink Insert is the way forward to faster and more ergonomic manual cleaning. The PureStation Sink Insert fits into pre-existing sink basins to raise the work level when manually cleaning instruments. Temperature strips, water volume markings and a chemical mixing well increase accuracy and help assure consistent results when using cleaning solutions. The PureStation Sink Insert can be used on countertops, sink basins or in mobile carts. The optional FlexiPump™ Independent Flushing System can accommodate almost any lumened device or endoscope to add standardized automated flushing to your workflow.

Optional FlexiPump™
Independent Flushing
System

Water volume indicator
and chemical mixing
well help assure
accurate dilution rates
