

PureStation™ Mobile Cart Revital-Ox® RESERT® Bracket

The Revital-Ox® RESERT® Bracket is used in conjunction with the PureStation™ Mobile Cart to create separate, dedicated soaking areas for high level disinfection. The cart can free up counter space for other uses, such as staging instruments, scopes, or trays. When a sink insert isn't required, the adapter bracket can retrofit a mobile cart for a secondary use, offering a mobile HLD solution.

Remove bracket for PureStation™ Sink Insert for other dedicated uses

Bracket is easy to place on PureStation™ Mobile Cart

Compatible with existing Revital-Ox® RESERT® basins

**Requires a PureStation™ Mobile Cart system.*
