

PureSteel™ Mobile Soaking Station

The PureSteel™ Mobile Soaking Station creates a dedicated space for soaking instruments during peak reprocessing hours. The Mobile Soaking Station easily accommodates robotic instruments to horizontally soak, and is built on casters for transport and mobile soaking needs.

- ◆ Economical solution for 30-minute robotic soaking per IFUs
- ◆ Create extra sink spaces for reprocessing, or establish dedicated areas for specific instruments
- ◆ Create dedicated spaces for soaking during peak reprocessing time
- ◆ Easily accommodates robotic instruments, scopes, or other longer instrumentation
- ◆ Small footprint conserves space
- ◆ Features ball valve for draining to floor drain; sink hoppers
- ◆ Built on casters for easy transport
- ◆ Optional accessories to make each station dedicated to its appropriate use (robotics flushing, soaking scopes, etc.)
