

APPLICATION

The PureSteel Mobile Soaking Station is intended for use in the reprocessing and disinfection of surgical equipment and devices including but not limited to leak testing, soaking, flushing, manual cleaning, and rinsing.

DESCRIPTION

The PureSteel Mobile Soaking Station is a stainless steel mobile soaking cart that allows reprocessing departments to include additional space for soaking and reprocessing, while providing sink basin measurements that allow longer instrumentation to horizontally soak. PureSteel Mobile Soaking Stations feature organizational pegboards to organize reprocessing tools at the work space.
