

PureClear™ Visualization Station

Dedicated quality assurance stations for borescope, ATP, and more

The PureClear™ Visualization Station creates designated areas for essential tasks like visual inspection, biologicals, ATP/protein testing, and more. Tailored to your facility's workflow, the Visualization Station combines internal and external visual inspection capabilities with video displays, a pegboard for organization, ergonomic height adjustability, and additional power to easily integrate IT and lighting.

- ◆ Height-adjustable for greater technician & nurse ergonomics. Keep tools within easy reach on the pegboard.
- ◆ A large, 36"x36" surface area for staging instruments. Also available in a Mini option for smaller spaces: 24"x24".
- ◆ Lighted shelving, task lights, monitor mounts, and organization bins keep areas organized, and tables clutter-free.
- ◆ Integrated outlets make power management easy—each station requires only one wall outlet and comes with up to 6 additional power outlets.
- ◆ Can be integrated into a decontamination or endoscope reprocessing room to create visual inspection practices before further reprocessing.

Sizes

| | |
|--------------------------------|-----------|
| Standard Visualization Station | 36" x 36" |
| Mini Visualization Station | 24" x 24" |
