

PureStation™ Sink Insert

The PureStation™ Sink Insert is the way forward to faster ergonomic pre-cleaning. The PureStation™ Sink Insert can be used on countertops, in sinks, or on mobile carts. Temperature strips, water volume markings and a chemical mixing well increases accuracy and helps assure consistent results when using cleaning solutions. The optional FlexiPump™, tubing and connectors accommodate almost any lumened device or scope to add standardized automated flushing to the process. Better patient care starts at the sink.
