PureSteel™ Healthcare Reprocessing Sinks

Engineered by sink experts who understand the reprocessing space, PureSteel™ Healthcare Reprocessing Sinks are the comprehensive stainless steel sink choice for reprocessing departments. PureSteel sinks are height-adjustable with an electronic push button so that each technician or nurse can meet their ergonomic requirements. This feature prevents unnecessary back bending while protecting instruments from damage. An ergonomic wrist rest is also integrated to remove pinch points during reprocessing and reduce wrist strain and injury.

PureSteel Healthcare Reprocessing Sink

- Height-adjustable for optimal worker ergonomics
- Slanted wrist edges remove pinch points, and strain at the sink
- Height-adjustable storage shelf makes cleaning under the sink easy
- Touch screen monitors for instrument tracking, IFU libraries, and more
- Deionized faucets per guideline requirements

Options

- Custom sizes built to each project's specifications
- Overflow prevention drains
- Custom bay sizes and lengths
- Custom designs and layouts for back walls
- Custom back wall sizes and lengths to accommodate pass-thru windows and more
