# PureSteel™ Healthcare Reprocessing Sinks

Engineered by sink experts who understand the reprocessing space, PureSteel™ Healthcare Reprocessing Sinks are the comprehensive stainless steel sink choice for reprocessing departments.

## PureSteel Healthcare Reprocessing Sink

Open configuration per AAMI guidelines

Easy access, height-adjustable storage shelf

### Custom abilities:

- Custom sizes, both in length, width, depth
- Back wall designs, heights, and pegs
- Basin placement and sizes, including length, width and depth

## PureSteel™ EZ Hinge™ Pegboards

- Optional, customizable hinged pegboards for all reprocessing sink styles & models
- Allows technicians and nurses to easily clean behind pegboards
- Staff can more readily remove, re-organize and add accessories and tools to pegboards
- Allows easier servicing, providing access to power cords, fixtures, etc.
- Hinged pegboards lock in place, providing security

Effortlessly clean behind and hard-to-reach areas of equipment

# PureSteel™ Reprocessing Solutions

## PureSteel™ Xi Healthcare Reprocessing Sink

- Height-adjustable for ergonomics
- Slanted wrist edges to prevent wrist strain & injury
- Small footprint
- Integrated with additional electrical outlets for capacity
- Creates a dedicated reprocessing area for instruments with unique IFU or requirements
- FlexiPump Independent Flushing System, Touchless Dose Pump, protective sink liners, and Waterproof Timers available

## PureSteel™ Mobile Soaking Station

- Creates extra sink spaces for reprocessing
- Creates dedicated spaces for soaking, and is ideal for 30 minute robotic soaks per IFUs
- Accommodates robotic instruments & orthopedic sets
- Small, mobile footprint conserves space
