

# New Generation of Pull Through Endoscope Brushes

Validated High-Level Cleaning Efficacy for Scratched Channels

Cleans endoscope channels in just ONEPASS™ with validated performance!

**SuperDART® three-stage design effectively eliminates debris and bioburden in just ONEPASS instead of 3!**

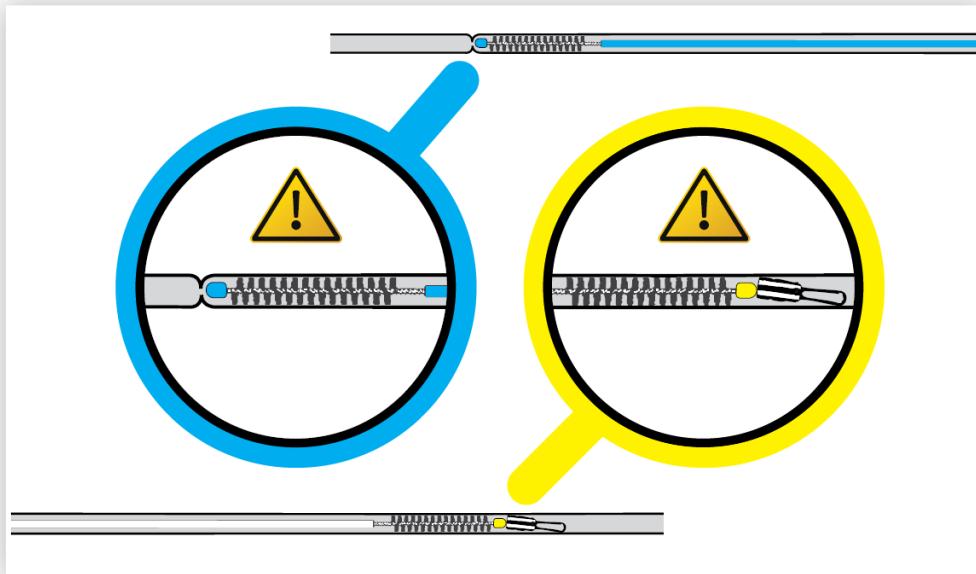

- ◆ Leading Brush cleans debris from channel
- ◆ Squeegee conforms to channel design, pulling in enzymatic and removing bioburden
- ◆ Tail Brush removes remaining debris and bioburden from scratches and dents

*"Doesn't bring the bio burden back into the channel."*

**ONEPASS does the work of three!**

Scan to watch Product Video to learn how SuperDART® works and why it's the leading endoscope brush solution.

Color-coded SmartSTOP™ prevents accidental jamming and detects channel flaws.

#### SuperDART® ONE PASS™ with SmartSTOP™

- ✓ Objective validated high-level of cleanliness
- ✓ Time savings with a single swipe
- ✓ Operators' fatigue reduction

#### Standard and Pull Through Brushes

- ✗ Subjective and uncertain cleanliness
- ✗ Multiple passes required
- ✗ Repetitive strenuous work

Provide your patients with the highest standard of care by adopting the SuperDART® in your facility.
