

# PureStation™ Mobile Cart

The PureStation™ Mobile Cart assures easy transport and storage of the PureStation™ Sink Insert and its contents. PureStation inserts fit perfectly into the mobile cart and is available with or without the FlexiPump™ Independent Flushing System. This cart has a multi-purpose function:

- Enables processing at point-of-use
- Safely accomodates transport of scopes and instruments
- Can be brought out at peak reprocessing hours as an additional sink
- Can be used to establish a separate dedicated manual cleaning area for ocular instruments

The Revital-Ox® RESERT® Bracket, used with the PureStation™ Mobile Cart, creates dedicated disinfection areas, frees up counter space, offers mobile high-level disinfection solutions, and provides versatile, efficient use with existing equipment.

*OSHA Central Supply, "use carts with large, low rolling, low resistance wheels, that can easily roll over mixed flooring as well as gaps between elevators and hallways."*
