

PureSteel™ Workflow Plates

Ensuring workflow compliance in sterile processing and endoscopy

Maintain compliance in your department's workflow with PureSteel™ Workflow Plates. These durable, easy-to-read plates provide clear visual indicators for functional areas, ensuring adherence to directional workflow standards.

As workflows evolve, new processes are introduced, or staff training is needed, Workflow Plates help reinforce one-way workflow protocols with large, highly visible text. Keep your department organized, compliant, and running efficiently with PureSteel™ Workflow Plates.

Available in:

Great for:

- ◆ Decontamination sinks in sterile processing or gastroenterology
- ◆ Soaking stations
- ◆ QA stations, such as borescope testing areas, ATP test points, and biological stations
